

THIGH LIFT BEFORE SURGERY INSTRUCTIONS

We want your cosmetic surgery experience to be as safe and pleasant as possible. We will not take any undue risks with your health. Begin by reading all of the information you have received twice. It is your responsibility to follow these instructions. It is important you understand all of the materials. If you have any questions about any of this information, call us as soon as possible at 952.449.4900. Ask for Sandy Hanson or Dr. Bashioum.

Do I need a medical examination before surgery?

To verify your good health, have your personal physician complete a history and physical examination within two weeks before your surgery date. Please use the enclosed form (Preoperative History and Physical Examination Form) for documentation of your preoperative physical. A copy must be at our office three days before your surgery. Please ask your physician's office to fax the form to our office (952.449.5582) once it has been completed. Also, please have your physician office give you a copy of the completed. Hand-carry this form to our office the morning of surgery.

When do I pay for my surgery?

Payment is due in our office two weeks before surgery. If payment is not received two weeks prior to the surgery date, your surgery will be rescheduled. We accept cash and cashiers checks. Personal checks are accepted prior to two weeks before your surgery. You may use a credit card (Visa or MasterCard) to pay for your surgery. We also provide a finance program. My suggested fees include professional fees, anesthesia fees, operating room costs, equipment use fees, implant costs, before care and after care.

What happens if my surgery is cancelled?

Although rare, surgery may be postponed or cancelled. This is usually for health reasons and your personal safety. We will not take any undue risks with your health. It is your responsibility to maintain good health prior to your surgery. You must avoid exposure to virus infections (colds, flu), take your prescription medications as prescribed, stop all non prescription medication, stop smoking, stop alcohol consumption, and stop all illicit or illegal drug use. If you cancel surgery less than one week before the scheduled surgery date, you will be charged a 25% cancellation fee. Bashioum Cosmetic Surgery Center, Ltd. is not responsible for any expenses incurred by you if surgery is cancelled or postponed for any reason. These expenses include but are not limited to hospitalization costs, prescriptions, home nursing care, preoperative history and physical examination, laboratory costs, pathology fees, travel expenses, time off work, housing costs, and/or meal costs.

What medicines can I take before surgery?

Stop taking all non-prescription or over the counter medicines two weeks before surgery. In other words, stop all drugs, medicines, preparations, herbs, homeopathic treatments, and extra vitamins that are not prescribed by a medical doctor. This includes all aspirin or ibuprofen containing products, all homeopathic drugs, all natural drugs, or all herbal drugs, all extra vitamins, all illicit or illegal drugs (cocaine, crack, THC, marijuana, narcotics, heroin, LSD, PCP, speed, or amphetamines). Please review the attached list of drugs to avoid (Medications to Avoid Before Surgery). These medicines will lead to problems with anesthesia and surgery. It is possible to die from these drug induced complications. These complications can ruin the result of your surgery as well. Your surgery will be cancelled if you take any of these medicines. Call us if you are not absolutely sure about a particular medicine. We recommend you take only one multivitamin daily for two weeks prior to your surgery. Take only acetaminophen (Tylenol) for pain. Most prescribed medications should be taken before and after your surgery.

Should I stop smoking?

Do not smoke or use tobacco or nicotine products (snuff, chewing tobacco, Nicorette gum, nicotine inhaler, or nicotine skin patches (Nicoderm)) for two weeks before and two weeks after surgery (see Medica-

THIGH LIFT BEFORE SURGERY INSTRUCTIONS

What do I do the morning of surgery?

Take another shower the morning of your surgery washing your hair, face, and body with soap. Do not put anything on your skin after your shower including body moisturizer, deodorants, antiperspirants, or makeup. These can interfere with surgical markings, skin cleansing, and anesthesia monitoring. Do not eat or drink anything the morning of surgery including coffee, tea, or water. You may brush your teeth provided you do not swallow any water. Do not chew gum. If you are a diabetic or take prescription medications ask us about taking your medications the morning of your surgery. Do not wear contact lenses. You may wear glasses to my office. Do not wear any jewelry or piercings the day of surgery. Wear loose fitting clothing. Do not wear anything that needs to be pulled over your head. Wear a blouse or shirt that buttons or zips up the front. Wear loose shorts covered with sweat pants or workout pants.

How do I prepare for the night after surgery?

Every patient is apprehensive about the night after surgery. Proper preparation will make this first night easier for you. First, read your after surgery instructions twice. If you have any questions make sure they are answered before your surgery. An adult will need to pick you up after your surgery and drive you home. I do not recommend you travel more than one hour to your home. If you live further than this from my office, you should arrange to stay in a hotel near my office. An adult must stay with you continuously for the twenty-four hours after your surgery. This is necessary to help you in case of any emergencies. Your companion must also care for any children that will be staying with you.

What can I tell my friends and family so they will not know I have had surgery?

I recommend you be honest with yourself, family, and friends. It is particularly important with regards to your spouse or significant other. You will be surprised to see how much support and approval you receive.

What should I do if I am pregnant?

You must not be pregnant at the time of your surgery. If you are late for your menstrual period or flow, call us immediately. The medications we use for surgery can interfere with pregnancy and cause birth defects.

What should I do if become ill before surgery?

If you develop an illness such as a cold, the flu, sore throat, infection, diarrhea, vomiting, nausea, fever and/or chills, please call my office as soon as possible. We will determine at that time if we need to delay your surgery based on your symptoms. If surgery is performed when these conditions are present, there is an increased risk of complications.

What should I do if I have questions before surgery?

Remember we are here for you. We want this surgery to be as safe and pleasant as possible. Call us any-time you have questions or concerns. During office hours (8:30AM to 4:30PM, Monday through Friday), call **952.449.4900** and we will answer your questions. After hours, first call me on my **mobile phone at 612.940.0048**, then at **my home number, 952.473.7854**. If the concern is not urgent and is able to wait until the next business day, you may leave a message at 952.449.4900 after hours or on weekends.
